

FOR IMMEDIATE RELEASE

VOICE ON THE GO® ENABLES MOBILE USERS TO SEND EMAIL AND SMS AS TEXT, BY VOICE

Toronto, Canada – February 16, 2009 – Voice on the Go Inc, the world leader in Email by Voice*, today announced the launch of additional new powerful features to its award winning Email by Voice solution. Mobile users can now leverage Voice on the Go's Email by Voice* and SMS by Voice* solution to reply, compose and forward email and SMS by voice, as text – without ever having to type! Voice on the Go is the only provider in the world to offer such a sophisticated suite of voice-based solutions to over 5 billion mobile users.

Voice on the Go requires nothing more than a mobile phone from which users can access their email and SMS by voice. This provides customers with a solution for hands-free and eyes-free communication, all at a price point that meets recessionary budgets.

“With today’s demand for instant communication, it is imperative for mobile professionals and consumers to have hands-free access to email and SMS “on the go”, and especially while driving,” says Voice on the Go CEO John McLeod. “Voice on the Go provides mobile users with an elegant solution that allows them to listen, compose, reply, forward and delete their email by voice without having to type. They can also create and send SMS text messages by voice, hands-free, without having to type. With the addition to our core offering of new “Social-Content-by-Voice*”, such as posting to Twitter and Facebook by voice, Voice on the Go has set itself apart as The World Leader in Email by Voice* Solutions.”

Voice on the Go – Email by Voice* & SMS by Voice* Solution:

Listen to Email – Voice on the Go converts email from text into speech, allowing the user to listen to their email hands-free/eyes-free while driving.

NEW – Reply, Compose and Forward Email with Voice-to-Text* – The user replies by Voice to the email message, Voice on the Go then converts the message into text and sends it.

NEW – Send SMS Messages Using Voice-to-SMS* – The user composes an SMS message by Voice, which is then converted to text and sent as an SMS text message.

Search Contacts and Dial Phone Numbers by Voice – Contacts can be accessed and calls placed through local access numbers, worldwide, **by Voice**.

Check Calendar and Schedule Appointments by Voice.

Works with ANY Mobile Phone, Carrier Network or Headset – Voice on the Go works with ANY mobile phone including Blackberry® smartphone™, Apple iPhone™, Windows Mobile®, Google™ Android, Palm® Pre™ and Symbian devices, on any carrier network and with any Bluetooth, wired-headset or in-car audio system.

COMING SOON!

NEW – Voicemail-to-Text* (Visual Voicemail) – Receive your voicemail as Email or SMS, **by Text**

NEW – Facebook – Change Your Profile Status **by Voice**

NEW – Twitter – Speak Your Tweet and Post **by Voice**

NEW – RSS Mobile Feeds: Personalized Content such as Stocks, Traffic and Sports **by Voice**

--more--
